### **L-3 Security & Detection Systems Provides Brazilian Airports with Detection Systems for Baggage Handling**

WOBURN, Mass., June 18, 2013 – L-3 Security & Detection Systems (SDS) announced today that it will supply Rio de Janeiro's Galeão International Airport and Sao Paulo's Guarulhos International Airport with its eXaminer<sup>®</sup> systems and other detection equipment to be used in the airports' first fully automated baggage handling and sorting systems.

"These new systems will enable the airports to provide enhanced security and improve operational efficiencies," said Thomas M. Ripp, president of L-3 Security & Detection Systems. "We are proud to support Brazil's expanding transportation infrastructure as it prepares to host the 2014 FIFA World Cup<sup>™</sup> and the 2016 Olympic Games."

L-3 SDS will deliver several screening solutions to the airports' baggage handling systems and services supplier, Vanderlande Industries. These include the eXaminer<sup>®</sup> 3DX and eXaminer<sup>®</sup> SX computed tomography systems, MVT-HR<sup>®</sup> automated high-speed explosives detection systems, as well as OptiNet<sup>™</sup> networking and service to help clear more bags with less staff.

L-3 SDS offers a comprehensive portfolio of internationally certified and recognized EDS solutions approved by TSA, ECAC and other global regulators. Its EDS solutions provide automated and continuous flow CT capabilities using advanced explosives detection technology. With some of the lowest false alarm rates in the industry, L-3's lightweight and reduced-size to medium- and high-speed systems accelerate the movement of passengers and bags.

Since 1998, L-3 SDS has used medical-grade imaging technology developed for aviation security with an understanding of the complex demands faced by airport personnel and regulatory agencies around the globe. L-3 SDS systems have been deployed at airports domestically and internationally and are supported by its world-class service organization.

**About L-3 Security & Detection Systems**

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets.
