For Immediate Release

**L-3's ClearScan™ Explosives Detection System for Cabin Baggage
Qualifies for EU Type D/D+ Standard 2**

– Paves the Way for Liquids and Electronics to Remain in Carry-On Bags –

WOBURN, Mass., November 19, 2015 – L-3 Security & Detection Systems (L-3 SDS) announced today that its new ClearScan™ explosives detection system (EDS) has passed the European Union (EU) Regulation Type D/D+ Standard 2 for cabin baggage under the European Civil Aviation Conference (ECAC) Common Evaluation Process (CEP) of Security Equipment. L-3's ClearScan cabin baggage screener uses CT technology and advanced algorithms to deliver automated detection of liquid and bulk explosives at a low false alarm rate. It offers passengers the convenience of keeping liquids and electronics in carry-on bags during the security screening process.

“Our commitment to provide our European customers with advanced technology to enhance airport security and efficiency is stronger than ever,” said Tom Ripp, president of L-3 Security & Detection Systems. “We are in discussions with airports worldwide regarding trials and are confident that ClearScan will comply with the forthcoming EU detection Standard C3.”

ClearScan detects bulk and sheet explosives, as well as liquid and other homemade explosives (HMEs), and is designed to expand its detection capability as future threats emerge. An operator's review of weapons and other prohibited items is accelerated with 2-D and 3-D high-resolution imaging and powerful alarm resolution tools, including virtual laptop removal. The system has the smallest footprint of any available CT, making it easy to integrate into existing checkpoints. When combined with an automatic diverter, a tray return system and L-3's IntelliCore™ Remote Screening and Command Center software solutions, significant airport operational cost savings can be achieved due to reduced staffing requirements – all while improving the checkpoint's throughput rate.

About L-3 Security & Detection Systems

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (L-3 SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include networking; 3-D computed tomography; automated, conventional and high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets. To learn more about L-3 SDS, please visit the company's website at www.L-3com.com/sds.

About L-3

Headquartered in New York City, L-3 employs approximately 45,000 people worldwide and is a prime contractor in aerospace systems and national security solutions. L-3 is also a leading provider of a broad range of communication and electronic systems and products used on military and commercial platforms. The company reported 2014 sales of \$12.1 billion.
